Productive Cluster
of the Environment and the Reuse

DIPAR'S VISION

DIPAR intends to represent the favourite meeting place in which links the plurality of professional subjects that deal with environment, with the purpose to realize a new synergy among scientific, cultural skills and productive and entrepreneurial abilities.

The goal is that to realize a strong connection between the sectors of research and production, with the purpose to support the development of technological innovation processes, to motivate the industrial search for a reduction of the environmental impacts and of the production of the rubbish, to sustain the pre-competitive development, to develop the environmental communication, to encourage the internazionalization of a new Environmental Integrated System and to promote also the training of highly qualified staff inside environmental companies and in the public administration.

DIPAR'S STRATEGIC POINTS

1. *To link the Apulia companies working in the DIPAR to create division associations, structured at the level to operate in a synergic way in the sector of the rubbish, of the drainages and of the waters' cycle.*
2. *To create a net of communication and information for the diffusion of the data, the training and on-going updating about environment system.*
3. *To create a network of real services to the companies working in the environmental field.*
4. *To promote and to support the development of innovations, in the productive systems, finalized to the safeguard of the environment with the branch of Apulia research.*
5. *To encourage the internationalization of the companies members of the cluster increasing actions of technological transfer toward the developing countries with the purpose to spread the use of the best available technologies for the environmental safeguard and finalizing the promotional investments in the Balkan areas of next entry in the UE.*
6. *To promote the high training in environmental field to support the insertion of qualified human resources in the companies of the cluster with the purpose to increase the competitiveness of the same at a national and international level.*
